

Heart Rate Variability Complete System List

Packages designed to make your choice in
heart rate variability easier

1

Heart Rate Variability Starter System HRV Suite

Our starter HRV system is ideal for clinicians who want to begin exploring heart rate variability biofeedback without overwhelming their budget. This medical grade system provides out-of-the-box functionality with a set of simple tools for assessing and training HRV.

ProComp2

2

Heart Rate Variability Intermediate System Physiology Suite

Go one step further with our HRV Intermediate System which adds the ability to record key peripheral physiology with the HRV measures. The system comes with the 5-channel ProComp 5 and all the software tools you need to widen your heart rate variability biofeedback capabilities.

ProComp5 Infiniti

3

Heart Rate Variability Expert System CardioPro Infiniti Module

The HRV Expert System includes everything you need to get the full picture on the physiological underpinnings of heart rate variability. The system comes with our most versatile encoder device, all the relevant physiological sensors and powerful software for recording, doing biofeedback with, reviewing and analysing HRV data.

ProComp Infiniti

Heart Rate Variability: Complete System List

1

Heart Rate Variability Starter System HRV Suite

Shop Online

Introduce heart rate variability biofeedback into your practice with this compact and easy to use two-channel device which comes with a finger pulse and a respiration sensor, powerful multimedia biofeedback software and the HRV Suite.

Encoder	• ProComp 2 Encoder - 2 Channel
Software & Suite	• BioGraph Infiniti Software • HRV Suite
Sensors & Electrodes	• Blood Volume Pulse/Heart Rate Sensor • Respiration Sensor
PRICE	\$2370.00 US

2

Heart Rate Variability Intermediate System Physiology Suite

Shop Online

Heart rate variability is created by the interplay of many physiological processes but most HRV systems on the market only monitor heart rate. The HRV Intermediate System gives you a much broader perspective on the physiology of HRV, with the mid-range ProComp 5 encoder and physiological sensors, which include EKG, respiration skin conductance and peripheral temperature. BioGraph Infiniti and the Physiology Suite complete the system to give you the largest variety of HRV biofeedback options.

Encoder	• ProComp5 Infiniti Encoder - 5 Channel
Software & Suite	• BioGraph Infiniti Software • Physiology Suite
Sensors & Electrodes	• Respiration Sensors • Skin Conductance Sensor • Temperature Sensor • Blood Volume Pulse/Heart Rate Sensor
PRICE	\$4245.00 US

3

Heart Rate Variability Expert System CardioPro Infiniti Module

Shop Online

This complete heart rate variability system includes the powerful, 8-channel, ProComp Infiniti encoder and a set of physiological sensors such as EKG, BVP, respiration, skin conductance and peripheral temperature. EKG gives this system the most precise heart beat detection capabilities and respiration lets you view and analyse the dynamic relationship between breathing and heart rate variability. Skin conductance and temperature are the best tools to observe the interplay between the sympathetic and parasympathetic nervous systems. With both an EKG and a BVP sensor, expert users can also record and train pulse transit time (PTT).

Encoder	• ProComp Infiniti Encoder - 8 Channel
Software & Suite	• BioGraph Infiniti Software • Physiology Suite • CardioPro Infiniti Module
Sensors & Electrodes	• 2x Respiration Sensors • EKG Sensor • Skin Conductance Sensor • Temperature Sensor • Blood Volume Pulse/Heart Rate Sensor • Uni-Gel Electrodes
PRICE	\$6315.00 US
